DETAILED ACTION

In response to the IDS and Amendment of 7/5/05, the examiner withdraws the rejection under 35 U.S.C. 102 (e), repeats the ODP rejection here and makes it Final.

Remarks – The applicant argues with respect to the rejection based on Obvious Double Patenting in order to be double patenting, the same inventors would have to be involved. And that since the Singh patent does not have common inventors with the present application, the judicially created doctrine of obviousness-type double patenting has no applicability here.

The 6,607,862 patent to Yan et al. has a common assignee and one common inventor. This is all that is required to make an obvious type double patenting rejection. The Sing et al. reference is a secondary reference used to show an obvious modification and does not need to have any common inventorship or ownership with the claimed invention.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1756

Claims 1-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-56 of U.S. Patent No. 6,607,862 in view of Singh et al. (6,724,462). Singh et al. teach in Table 8 shows layer materials and thicknesses for Examples 72 to 76 which comprise 49 periods of Mo/Si with the additional period formed by the X/Z combination again terminated with a Ru capping layer. The reference example 72 represents a fully oxidised top Si layer upon which a Ru capping layer is applied.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
